

National Program Equity in Health (PNES)

Area "Oppose health poverty" CUP: F71H24000100006

The Local Health Unit (ASP) of Palermo participates in the creation of National Program Equity in Health (PNES), financed with the FES+ and FESR funds, by European Community. The project provides free healthcare services, specialistic visits, class A and class C medications, mobile dental prostheses in local primary care clinics and in motorhomes. The first local primary care clinic is active since 31/01/2025 at PTA Casa del Sole in Palermo (see info box below).

40% of the recipients of the interventions will be citizens of Third Countries not registered to the Health National System- with STP, which will have to meet some important criteria of socio-economic vulnerability, attested by adequate documents.

COMUNICATION to the Spokepeople of Foreign Associations and Comunities

Given the significant presence of foreigners among the recipients of the project, the creation of a technical table has been planned, which will see the presence of the representatives of ASP together with the Spokepeople of Associations and Comunities of foreigners present throughout the district of Palermo. In order to the establishment of the technical table, an expression of interest to allow the nominations of the Spokepeople will be published on the website of ASP of Palermo

On April the 3°, a meeting will be held at the location of Moltivolti Social Enterprise, at Via M. Puglia, n° 21 Palermo, at 5.00 PM, to present the Project and the methods of participation in the public notice.
